

It has been my experience that the FCC has insufficient manpower to provide enforcement to resolve the interference issues that may arise from BPL. Don't make the same mistake with BPL that was made with the Nextel vs Public Safety issue on 800MHz. If any known individual interfered with Public Safety for an extended period of time, they would be in jail. The magnitude of the problem seems to cause slow enforcement. I am concerned that after a rollout of BPL, it will be nearly impossible to enforce compliance. Consider the CB radio boom as an example of deregulation due to lack of enforcement capacity.
